

## **Graduate School of Engineering**

### **Major:**

- Mechanical Engineering
- Chemical Engineering and Biotechnology
- Environmental Engineering
- Industrial Systems Engineering
- Urban Development
- Intellectual Property Engineering
- Logistics Management Engineering
- Energy

### **Introduction**

The Graduate School of Engineering is comprised of seven Master's programs in engineering, in addition to the CEO program and CKO program. The Master's programs offer night courses with special emphasis on working-level knowledge of industrial fields in consideration of the majority of the students as industrial workers, while maintaining courses on theory, lab, and thesis research comparable to other graduate programs. The CEO program and CKO program focus on education on topical issues for corporate leaders and executives and administrators of public institutions, aiming to cultivate their competence and capacity to contribute to the development of industrial society as part of academic-industrial cooperation.
